FC SAFETY

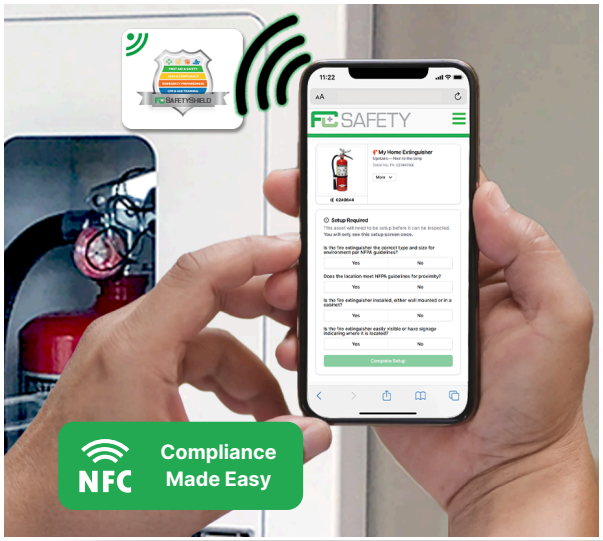

NO APPS NEEDED!

Get in touch with your *entire* Safety Program

With the Safety Shield® you can!

The patented Near Field Communication Solution from FC Safety puts **Compliance questions (OSHA/NFPA/etc.)** in the hands of inspectors and enables you to see the **compliance status** of all your safety assets across your **entire organization**, in real-time!

Tap into the FC Safety Shield®

- Tapping the Safety Shield® sends specific compliance questions (OSHA/NFPA/etc.) to the inspector
- Monthly email inspection reminders to the entire safety team
- Customizable Safety Dashboard
- Robust reporting for audits, budgeting, and planning
- Record inspection routes for others to follow
- Cascading Alert system for critical issues
- Customizable inspection questions for customer-specific categories (Enterprise)
- Reorder supplies
- Supply expiration reminders

No Apps need to be downloaded, NFC is present in most smartphones

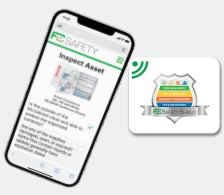

1

Tag

Attach the FC Safety Shield **Tag** to your safety assets

2

Tap

FC Safety Shield, Patent 12,156,111

Eliminate Costly Van Based Service

Instant Asset Inspection

Inspectors simply tap their mobile phones to the FC Safety Shield, no mobile app needed.

Expiration Data Notifications

Track important safety dates alerting your users when to replace items, ensuring items are current and viable.

Easily Reorder Supplies

Inspectors can easily reorder items when and where they are needed, at the site of the safety asset.

Geocoded for Compliance

The NFC tag ensures that your inspections are taking place at the site of your safety asset.

Robust Backend Reporting

Our system escalates any out of compliance situation so quick action can be taken to correct compliance.

Take Full Control

Be in charge of ordering only what you want and need. Save money and increase your safety.

Risk Management

Engagement by your employees dramatically improves chances for successful outcomes.

Save Money

Our cost effective solutions saves up to 50% when compared with van-based first aid services.

NFC vs. QR Codes & Barcodes

QR Code & Barcode systems are not secure; NFC requires close proximity, ensuring that your inspectors are where you need them to be.

Automated Inspection Reminders

Built-in tracking guarantees that inspections happen on time to keep you safe and compliant.

Taking control of your own safety program with the FC Safety Shield saves you money, helps you manage risk, and keeps you compliant at a glance for all locations.
